LLOYD'S REGISTER OF SHIPPING

REGISTER BOOKS AND OTHER PUBLICATIONS

LLOYD'S REGISTER OF SHIPPING, issued annually in July. This Book contains the Names, CLASSES, and detailed information concerning the Vessels classed by Lloyd's Register and the late Underwriters' Registry for Iron Vessels; particulars, as far as possible, of ALL SEA-GOING VESSELS in the World, and of all iron and steel vessels trading on the North American Lakes, of 100 tons and upwards; dead-weight capacities of Steamers and Motor Ships; list of Motor Ships; lists of vessels fitted with Refrigerating Appliances, vessels carrying Petroleum in bulk, vessels fitted for Liquid Fuel, and Cable Steamers; list of Frozen Meat Stores and a list of Owners of Ships recorded in the Register Book.

In the Appendix will be found lists of Subscribers arranged according to place of residence and alphabetically (in the former list descriptions of Subscribers' businesses are entered), details of Dry and Wet Docks, Floating Docks, Pontoons, Patent Slipways, Tidal Harbours, Quays, &c., in all parts of the World; a list of Telegraphic Addresses of all firms, &c., connected with Shipping (with the Telegraphic Codes severally employed), so far as ascertained; a list of Steamers of 500 tons and upwards arranged according to nationality and gross tonnage; detailed Statistics respecting Merchant Shipping; lists of Ship builders, with names of existing Vessels built by each; list of fast Merchant Steamers; Index to Changes of Names of Vessels, &c., &c.

A list is also printed in the Appendix of the Members and Subscribers of Lloyd's, and of the Agents to Lloyd's.

TERMS OF SUBSCRIPTION:—The subscription for Marine Insurance Companies, Public Companies, or Public Establishments is $74.00 per annum for a single copy of the Register Book, and $43.00 per annum for every additional copy supplied; in the case of other Subscribers the subscription is $43.00 per annum for each copy. A Supplement eontaining the additions to, and corrections in, the Register Book is issued bi-monthly and forwarded gratis.

LLOYD'S REGISTER OF YACHTS. Established in 1877. Containing the names and particulars of about 7,000 yachts of all nationalities; also color plates of the Private Signals of yacht owners, and of the Burgees of British and Foreign yacht clubs; lists of signal letters, late names of yachts, designers, builders and yacht owners, with addresses and clubs. SUBSCRIPTION $12.50 per copy. Duty paid. Ready in May, 1928.

LLOYD'S REGISTER OF AMERICAN YACHTS. Established 1903. Containing the complete particulars of the yachts of the United States, Canada, the West Indies and South America; lists of yacht clubs and officers, former names, signal letters, and complete list of yacht owners of the United States and Canada, with addresses, clubs and yachts. Color plates of Burgees of Yacht Clubs and Private Signals of Yachtsmen. Blue Cloth, Gilt Edges: $14.00. Plain Canvas, $12.00.

LLOYD'S AMERICAN YACHT FLAGS. 50 lithographed plates containing the Burgees of 600 Yacht Clubs of the United States, Canada, the West Indies, and South America, and Private Signals of 2500 Yachtsmen. Bound in light, flexible Blue Cloth, uniform with the Yacht Register. Price, $3.00.

RULES FOR THE CONSTRUCTION AND CLASSIFICATION OF VESSELS. Rules for Steel Vessels. Price $7.50; Rules for Steel Trawlers. Price $5.00.

RULES FOR THE ENGINES AND BOILERS OF STEAM VESSELS. Including rules for Diesel and other Internal Combustion Engines, Electric installation on vessels, Refrigerating Machinery etc. Price $4.00.

RULES FOR THE CONSTRUCTION AND CLASSIFICATION OF YACHTS. Vol. 1. Wood Yachts (Sailing, Auxiliary, and Full Power), including Rules for Internal Combustion Engines and Diesel Engines. Price $7.50.

Vol. 2. Composite and Steel Yachts, including Rules for Steam Engines and Boilers and Electric Fittings. Price $7.50.

YACHTS OF THE INTERNATIONAL RATING CLASSES, prepared in accordance with the resolutions of the International Conference on Yacht Measurement held in London in October, 1919. Price $5.00.

Wood and Composite Ships. Price $5.00.

GEOMETRICAL PROPERTIES OF SHIP GIRDERS AND SECTIONS (Based on the British Standard Sections as revised in 1914), being a series of Tables giving, for a wide range of thicknesses, the sectional area, the centre of gravity, moment of inertia, and modulus of resistance of various rolled sections and girders, with and without plating, commonly used in Shipbuilding. Price, $10.00.

JORDAN'S TABLES, which comprise weights of Iron and Steel, together with other information useful to Naval Architects, Shipbuilders, and Manufacturers. Price, $10.00.

TESTS OF MATERIALS, containing the requirements of the Society's Rules for the testing of steel plates, sections, bars, iron and steel forgings, steel castings, steam pipes, anchors and cables, etc.: together with suggested specifications for materials for which there are no tests mentioned in the Rules of Lloyd's Register. Price $2.00.

PATENT ANCHORS, sanctioned by the Committee of Lloyd's Register, comprising lists (1) in alphabetical order of Patentees, (2) in alphabetical order of name (if any) of anchors, with descriptive sketches. Price, $10.00.

LLOYD'S REGISTER OF SHIPPING

CONSTRUCTION, CLASSIFICATION AND SURVEY OF YACHTS

THE early history of the classification of Ships is veiled in much obscurity; the first recorded attempt to establish anything like an organized Registry dates back no further than 1760, although it appears that before that date "Ships' Lists" were kept in manuscript by the Merchants who frequented Lloyd's Coffee House, which was situated first in Tower Street and afterwards in Lombard Street, London, and of which the earliest notice appeared in the *London Gazette* of the 18th February, 1668.

Lloyd's Register of Shipping was founded in 1760 and was reconstituted in 1834, the management being in the hands of a Committee of the leading Merchants, Shipowners and Underwriters of the day, to whom were added in later years representatives of the shipbuilders and engineers, and of the steel-making and forging industries.

In 1916 an American Committee of Lloyd's Register of Shipping was established, comprising representatives of the several interests concerned, whose co-operation in the business of the Society in the United States of America has proved to be of great advantage to the whole shipping community.

The work of the Society at the present time includes the annual publication of Lloyd's Register of Shipping, a list of the merchant vessels of the world; the establishment of rules for the tests of materials and the construction of vessels; the classification of vessels according to materials, methods of construction and equipment; and the maintenance of a system of survey in all the principal ports of the world, for vessels under construction, for condition at stated intervals, and for vessels in need of repairs.

At the request of leading British yachtsmen, the Society in 1877 extended its system to include pleasure vessels, special rules being drawn up to govern the construction of wood, composite and metal yachts; the rules and a list of British and Continental yachts being published under the title of "Lloyd's Register of Yachts."

The Society's Rules for the Building and Classification of Wood Yachts were thoroughly revised in 1925 to meet the latest requirements of yachtsmen (see preface to revised Rules for Wood Yachts), establishing a new standard fully in accord with modern materials and methods. Conforming closely to the best American practice of the present day in both racing and cruising yachts designed under the Universal Rule, Lloyd's Rules offer to American yachtsmen a reliable guarantee of both the original character and subsequent condition of yachts built under them, important alike to owner, seller or intending purchaser.

In addition to the Standard Yacht Rules referred to above, special Rules for the building and classification of Yachts of the International Rating Classes are published by Lloyd's Register.

These Rules were drawn in accordance with the resolutions of the International Conference on Yacht Measurement which was held in London in 1906, at which representatives were present from Austria-Hungary, Belgium, Denmark, France, Germany, Great Britain, Holland, Italy, Norway, Sweden and Switzerland, and they were accepted by the Permanent Committee of Referees on behalf of the Conference. These Rules were amended in October, 1919.

The aim in preparing them was to arrange for such scantlings as will enable a yacht to withstand the strains incident to racing, and yet when her racing life is over to be converted into a useful and serviceable cruiser.

The Tables give the requirements for each of the International Rating Classes for Wood Yachts from 6 metres to 14 metres inclusive, and for composite yachts from 10 metres to 20 metres inclusive, and are made out on the metric system as well as in the English measurements, in order to ensure uniformity in the different Countries.

In order to be classed under the standard Yacht Rules, or to obtain the special class "R" assigned to Yachts of the International Rating Classes, a Yacht must be built under the special survey of the Society's Surveyors.

An application for the survey should be made by either the Owner or Builder, who should state the class for which the yacht is designed. Either plans or a specification of the yacht (on a form specially prepared for the purpose), showing the scantlings and the materials proposed, should accompany the application for survey.

In the case of yachts not classed by the Society, surveys to ascertain the condition of hull and machinery previous to purchase may be made at the request of intending purchasers. Written application must be made for such survey, accompanied by the consent of the owner of his agent.

Full information as to charges and other details of survey and classification will be furnished upon application.

PREFACE

The necessity for a register of yachts has long been recognized in this country, and as early as 1874 a small but very well planned and complete volume was issued in New York. Since that time a number of publications have appeared, but all have been local rather than national in scope, confining themselves almost entirely to the larger yachts and clubs of the Atlantic seaboard, and appealing only to the owners of these yachts.

The conditions of American yachting to-day, with over 500 organized yacht clubs within the limits of the United States and the Dominion of Canada, demand a register which shall be essentially national and planned on a very different scale from all of the older lists.

In 1877 the Committee of Lloyd's Register of Shipping at the request of some of the leading British yachtsmen undertook the classification of yachts after the same plan as merchant vessels, and the publication of a Yacht Register similar to the Society's Register of Shipping; the work thus begun continuing to the present time. In 1902, in response to a similar demand from American yachtsmen, the Committee decided to issue a similar Register devoted exclusively to American and Canadian yachts, which book has been issued annually since 1903.

The experience of the first three years demonstrated the necessity for many changes from existing methods to meet the altered conditions of modern yachting, and in the 1906 Register an entirely new plan was adopted. The reasons which once existed for separating the Yacht List into two divisions—steam and sail—have entirely disappeared with the introduction of other types of motive power than the steam engine. There is now no clearly defined line between power and sailing yachts, and there is a constant changing of yachts from one division to the other. In view of these facts, it has been deemed advisable to group all yachts in one alphabetical list, regardless of type of hull, rig or means of propulsion.

The almost universal use of the internal combustion engine with various liquid fuels necessitates a more complete description of this type of engine; and the great diversity in hulls, and more particularly in the form of the house or cabin, calls for new particulars descriptive of this detail, as mentioned more fully in the directory.

Of the importance to the owner of a complete and reliable record of his yacht in the Register, it is not necessary to speak in detail; even without the added guarantee of the Society's classification, the complete particulars carry weight with all who may be interested in the yacht as possible purchasers or otherwise.

In the compilation of the book, every effort has been made to obtain correct particulars, but the available sources of information, both club and individual, are by no means as reliable as is desirable. The owner is, above all others, the one who can, and in his own interest should, furnish the necessary information, and the aid of all owners is requested in the work of further perfecting the Register in future editions.

New York, May, 1929.

DIRECTORY

Lloyd's Register of American Yachts is designed to include all yachts, both sail and power, without fixed limit of size. It is obviously impossible to list even the majority of craft under 30 feet length, or of the open launches, but every effort is made to enroll such of the smaller yachts as are notable in either cruising or racing. All yachts, regardless of type of hull, rig and power, are included in one list, in alphabetical order.

DIMENSIONS—The hull dimensions given in the Register are those generally used by yacht designers: the over-all length, load water-line length, extreme breadth, depth of hold and extreme draft; all measurements in feet and inches.

The over-all length is taken from the extreme fore side of the stemhead or figurehead to the after side of the taffrail. The load water-line length is taken at the surface of the water from the fore edge of the stem to the after side of the stern-post, horntimber or other partly immersed portion of the hull. The breadth is measured to the outside of the planking or plating, exclusive of mouldings and rubbing pieces. The depth of hold is measured from the upper side of the main deck beam, about the middle of the vessel, to the upper side of the ceiling next to the keelson. In yachts in which the decks are cut by trunk cabins or similar structures, the upper point of measurement may be obtained by springing a batten to the round of the deck in a fair line with the side decks. The draft is taken to the lowest point of the hull, exclusive of the centerboard, but including the screw if it projects below the keel.

As there is now no uniform system of measurement in use by yacht clubs and yachtsmen, the dimensions given by clubs and individual owners are not always taken as above. It is requested that owners will, whenever possible, verify from the yacht the dimensions given in the Register, and give notice of errors and the proper corrections.

RIG—The sail area includes the working sails only, without topsails and light sails. All single-masted yachts rigged with two headsails—fore-staysail and jib—are designated as cutters; and all rigged with a jib only, as sloops. Single-masted yachts carrying a mainsail, without a headsail, are designated as catboats.

DECKS AND CABINS—The general arrangement of decks and cabin houses is now such an important detail that additional descriptive abbreviations are included, in the center of column 3, as follows:

O Open yacht, with no deck nor waterways.

HD Half-decked, with deck and cockpit, but no cabin.

CH Cabin House, high house with glass sides, as in the old "naptha launch."

TC Trunk Cabin, low cabin house, as in the smaller sailing yachts.

RD Raised-deck, the deck raised above the normal planksheer and the topsides carried up to meet it.

FD Flush-deck, main cabins below the main deck, as in the larger steam yachts and deep sailing yachts.

DC Deck Cabin, with main cabins on the main deck, as in the largest steam yachts and the so-called "power houseboats."

TB Turtle-back.

ENGINES—Where more than one engine is installed, the number is indicated by the numeral 2, 3, etc., prefixed to the engine particulars in column 7.

Steam engines are indicated only by the abbreviations: C, compound; T, triple-expansion; Q, quadruple-expansion; Tur, turbine. Internal-combustion or explosion engines are indicated by the abbreviations Gas Eng. or Diesel. When fuel other than gasoline is used, such as kerosene or alcohol, or when oil or kerosene is used as fuel for steam boilers, special mention is made in the lower right hand corner of column 7.

The cycle of operation of internal-combustion engines, two-stroke (two cycle) and four-stroke (four cycle) is designated by the abbreviation 2Cyc or 4Cyc.

PORTS—The port given on the first line of column 9 is the "Home Port," where the permanent moorings of the yacht are located. In the case of a documented yacht, the Port of Registry, whence her papers issue, is given on the second or third line. Owners are requested to forward full information as to the Home Port as distinguished from the Port of Registry.

LLOYD'S REGISTER OF SHIPPING

COMITÉ FRANÇAIS—1928–1929

*M. Georges Philippar, *Président.*
MM. *F. Godard et L. Gaumont, *Vice-Présidents.*

*G. Breton,
Armateur,
Expert près du Tribunal de la Seine,
Administrateur de la Société Générale de Transports Maritimes à Vapeur, de la Foncière (Transports), de la Société de Construction Mécanique Procédés Sulzer, et de la Société des Entrepôts Frigorifiques et Docks de la Gironde.

†H. de Wendel, *Maître* de Forges.
Membre de la Commission de Direction du Comité des Forges de France,
Président de la Chambre de Commerce de Metz.

*H. Desprez,
Ancien Ingénieur en Chef des Ponts et Chaussées.
Président de la Compagnie Auxiliaire de Navigation,
Président de la Compagnie Africaine d'Armement,
Président de la Société Anonyme de Navigation "Les Armateurs Français,"
Président de l'Union Maritime Française.
Président du Comptoir Maritime (Cies Françaises d'Assurances Maritimes).

MM. *A. Dhôme,
Ingénieur de la Marine,
Administrateur Délégué des Chantiers Navals Français.

R. Fromageot,
Directeur des Compagnies d'Assurances Maritimes "Centrale" et "L'Ocean."

L. Gaumont,
Administrateur-délégué Directeur de l'Union Maritime (Cie d'Assurances Maritimes).

*Hubert Giraud,
Président du Conseil d'Administration de la Société Générale de Transports Maritimes à Vapeur,
Administrateur Délégué de la Compagnie de Navigation France-Amérique,
Administrateur de la Compagnie de Navigation Paquet, et des Chantiers et Ateliers de Provence.
(*Vice-Président du Syndicat Marseillais de la Marine Marchande.*)

MM. *F. Godard,
Administrateur Inspecteur Général de la Société des Chantier et Ateliers de St. Nazaire (Penhoët).

†A. Grosos,
Armateur, E. Grosos & Fils.

†M. Haas, *Ancien Ingénieur de la Marine,*
Membre du Conseil d'Administration de la Chambre Syndicale des Constructeurs de Navires et de Machines Marines.

†Paul Houët,
Capitaine au long cours,
Secrétaire technique honoraire du Comité Central des Armateurs de France.
Expert maritime près le Tribunal Civil de la Seine,

DIRETTORE DELL'ISTITUTO

Ingegnere Navale e Meccanico Comm. Domenico Barricelli

LLOYD'S REGISTER OF SHIPPING

AND THE

REGISTRO ITALIANO

NOTICE

In pursuance of the wishes of the Italian Government, an amalgamation was effected between the two Italian Classification Institutions, previously known as the Registro Navale Italiano, with headquarters at Genoa, and the Veritas Adriatico, with headquarters at Trieste, in order to establish one Italian register of shipping, under the name of the Registro Italiano.

An Agreement, which came into operation on the 1st April, 1922, has been arrived at between the new Registro Italiano and Lloyd's Register, with the object of facilitating the classification of vessels with both Societies in the interests of shipowners, shipbuilders and underwriters.

Under the terms of this Agreement, Italian shipowners, while securing the national classification for their vessels, will, at the same time, be in a position to have Lloyd's Register class with as little inconvenience and expense as possible.

With this object, the Agreement provides that each Institution will give every facility for the assignment of its classification to vessels classed, or intended to be classed, by the other Society, provided the standard of strength and security is not inferior to that required by its own Rules, each Institution reserving to itself the right of confirming the class by means of surveys by its own Surveyors.

In order to obviate delays and inconvenience to shipowners and shipbuilders, the surveys of the two Societies will, as far as possible, be held simultaneously, and the Surveyors of both Registers are required to co-operate in entire harmony, and to hold jointly the surveys which they have to carry out.

LIST OF SURVEYORS TO LLOYD'S REGISTER OF SHIPPING
IN UNITED STATES OF AMERICA AND CANADA

THE SURVEYORS AT THE FOLLOWING PORTS ARE EXCLUSIVELY THE OFFICERS OF THE SOCIETY, AND ARE NOT PERMITTED TO ENGAGE IN ANY OTHER BUSINESS OR EMPLOYMENT WHATSOEVER.

NEW YORK. (Office, 17 Battery Place; Cablegrams Nymdible; Telephone, Whitehall 0220, 0221, 0222.)
Chief Surveyor for the United States and Canada..... James French
Ship Surveyor..... Wm. Bennett, B.Sc.
Ship and Engineer Surveyors..... J. S. Heck, J. D. Peat, George Tully, G. R. Richardson, W. Runham, M. Dickson

BALTIMORE, MD. (Office, 1221–1222 Munsey Building; Cablegrams, Surveyor; Telephone, C. & P.: St. Paul 36.)
Ship and Engineer Surveyor..... H. A. Stewart
Ship Surveyor..... H. G. House

BOSTON, MASS., including Providence, R. I. (Office, Rooms 327-328, 131 State Street, Boston, Cablegrams, Surveyor; Telephone, Main 3021.
Ship and Engineer Surveyor..... †B. Stewart Murphy

CHICAGO, ILL. (Office, Postal Telegraph Building, 332 South La Salle Street; Cablegrams, Surveyors; Telephone, Wabash 1026.)
Ship and Engineer Surveyor..... †W. J. Wood

CLEVELAND, OHIO, including Lorain and Ashtabula. (Office, Terminal Tower, Public Square; Cablegrams, Lloyds; Telephone, Maine 3910.)
Ship and Engineer Surveyor..... G. Drummond

COLUMBUS, OHIO, including Middletown, Cincinnati and Dayton, Ohio, and Newport, Ky. (Address Box No. 277, R. D. No. 5, Station E, Columbus; Telegrams, Lloyd's Register.)
Surveyor for Chain Testing Duties, etc.... †F. Stabler

GALVESTON, TEXAS. (Office, Room 927, American National Insurance Building; Cablegrams, Register; Telephone, 3445.)
Ship and Engineer Surveyor..... C. F. Macdonald

JACKSONVILLE, FLA. (Address Blum Building; Cablegrams, Hubol)
Ship Surveyor..... †H. Boyle

LOS ANGELES, CAL., including Long Beach and San Diego. (Address, 524 West Sixth Street, San Pedro, Cal.; Cablegrams, Lloyds.)
Ship and Engineer Surveyor..... W. J. Alderson

MOBILE, ALA., including Pensacola, Fla. (Address, 59 South Julia Street, P. O. Box 985, Mobile.)
Ship and Engineer Surveyor..... F. H. Osbon

NEW ORLEANS, LA. (Office, 1845 Canal Bank Building; Cablegrams, Retsiger.)
Ship and Engineer Surveyor..... T. G. Dodd

NEWPORT NEWS, VA., including Norfolk and Richmond, Va. (Office, C. & O. Terminal Building, Newport News; Cablegrams, Register; Telephone, Bell 907.)
Ship and Engineer Surveyor..... C. J. Hudson

PHILADELPHIA, PA. (Office, 449, Bourse Building; Cablegrams, Surveyors; Telephone, Lombard 3543.)
Principal Surveyor..... O. Narbeth
Ship Surveyor..... E. I. Evans
Ship and Engineer Surveyor..... J. M. Buchanan

PITTSBURGH, PA. (Office, 1313 Esplanade Street; Telephone, Highland 4461.)
Surveyor for Steel Testing Duties..... †W. J. Fleming

PORTLAND, MAINE. (Office, 39 Exchange Street, P. O. Box 444; Cablegrams, Shipengine.)
Ship and Engineer Surveyor..... †W. Stewart

PORTLAND, OREGON, including both shores of the Columbia River and all Ports in Oregon. (Office, 509 Board of Trade Building; Cablegrams, Register.)
Ship and Engineer Surveyor..... †L. Harwood

† Not an Exclusive Officer of Lloyd's Register.

UNITED STATES OF AMERICA—*Continued.*

SAN FRANCISCO, CAL. (Office, Matson Building, 215 Market Street; Cablegrams, Freeboard.)
Principal Surveyor for Pacific Coast Ports.. D. Millar
Ship and Engineer Surveyors..... F. G. Archbold, S. G. Reader

SEATTLE, WASH., with Tacoma, Bellingham, Grays Harbor, and all Ports in Washington Territory; not including the Washington shore of the Columbia River. (Office, 1388-7 Dexter Horton Building, Seattle; Cablegrams, Lloyds; Telephone, Elliott 1699.)
Ship and Engineer Surveyor..... C. Hastie

PANAMA CANAL ZONE

BALBOA. With a district including all ports in the Panama Canal Zone. (Office, 218 Pacific Terminal Building, Balboa. P. O. Box 304. Telegrams, Register.)
Ship and Engineer Surveyor..... J. Short

MEXICO

TAMPICO. (Address, Apartado, 781; Telegrams, Verne Dyer, c/o Pulford Brothers, Tampico)
Ship and Engineer Surveyor..... †Verne Dyer

CANADA

CHIEF SURVEYOR FOR THE UNITED STATES AND CANADA. (Office, 17 Battery Place, New York; Telegrams, Nymdible, New York; Telephone, Whitehall 220-222.)..... James French

HALIFAX, N. S. (Office, 37 Furness Withy Building; Telegrams, Lloyd; Telephone, Sackville 906.)
Ship and Engineer Surveyor..... T. Moon

MONTREAL AND QUEBEC, with a district including the River St. Lawrence..... G. Allan
(Office, 208 Lake of the Woods Building; Telegrams, Register.)

ST. JOHN, N. B. (Telegrams, Dalton.)
Ship and Engineer Surveyor..... †C. E. Dalton

TORONTO, ONT., with a district including Lake Ontario and Collingwood, Ont. (Address, 1 Wellington Street West, Toronto 2.)
Ship and Engineer Surveyor..... †John Stephen

CANADA—*Continued.*

VANCOUVER, B. C., including Victoria, Vancouver Island and all Ports in British Columbia, (Office, 316-17 Metropolitan Building, West Hastings Street, Vancouver, B. C.; Telegrams, Registrar; Telephone, Seymour 2022.)
Ship and Engineer Surveyors..... A. Scott, W. Smith

NEWFOUNDLAND

ST. JOHNS. (Office, Marine and Fisheries Department, Custom House; Telegrams, Surveyor.)
Ship and Engineer Surveyor..... D. M. Macfarlane

GREAT BRITAIN AND IRELAND

WELLINGTON, N. Z. (Address, Nathan's Buildings; Telegrams, Diesel.)
Ship and Engineer Surveyor..... †D. K. Blair

† Not an Exclusive Officer of Lloyd's Register.

KEY TO SYMBOLS OF CLASSIFICATION

A Without a numeral prefixed; character assigned to Iron and Steel Yachts already built, to which the Society's Rules do not apply.

100A Character of Yachts built of Iron or Steel in accordance with or equal to the Society's Rules and Tables.

90A Character of Yachts built of Iron or Steel, in some respects deficient of the requirements of the **100A** class.

A Character of Wood or Composite built Yachts of the first class. The figures prefixed to the character indicate the term of years for which the Yacht is at present classed. Figures placed within parentheses indicate the expired term of years for which the Yacht was classed, originally, if on the first line, and on continuation or restoration, if on lower lines.

A Without a term of years indicates that the Yacht, though not built under Survey or according to the Society's Rules, is considered worthy of the class assigned.

R Character of Yachts built in accordance with the Rules for Yachts of the International Rating Classes, both as regards scantling and equipment. The figures prefixed to the character thus—16R, 14R, indicate the term of years for which the Yacht is at present classed.

1 The figure **1** after a character signifies that the equipment is in accordance with or equal to the requirements of the Society's Rules.

A line thus — after the character signifies that the equipment is not in accordance with the Society's Rules.

The figures under a character denote the date when the Yacht was last Surveyed.

When the Character is omitted from the tenth column it indicates that the Character has expired or been withdrawn from absence of Survey, or on account of non-payment of Survey fees.

The tenth column left blank indicates that the Vessel has never been Classed.

✠ In Column 10 indicates that the Yacht was built under the Special Survey of the Society's Surveyors.

✠ In Column 10, preceding a machinery record, indicates that the Engines and Boilers of the Yacht were built under the Special Survey of the Society's Surveyors.

$\overline{5,16}$ Indicates that the Yacht at the date mentioned, from reported defects, or on account of non-compliance with the Society's Rules, was not entitled to a character in the Yacht Register Book.

... In Column 10 indicates that the Yacht's class has been withdrawn at the Owner's request.

KEY TO SIGNS AND ABBREVIATIONS EMPLOYED IN THE REGISTER

A&CP.....	Anchors and Chains proved at a Public Machine recognized by the Committee of LLOYD'S REGISTER. (See Tables 24 and 25 of the Rules.)

Bgn.....	Brigantine.
BH.....	Bulkheads (with number of same prefixed).
BK.....	Bar Keel.
Bk.....	Barque.
Bkn.....	Barquentine.
Bkrs.....	Bunkers.
B&MS.....	Boilers and Machinery Surveyed, with date, denoting that the Boilers and Machinery, though not fitted strictly in accordance with the Society's Rules, were found, upon inspection at that time, to be in good condition.
BS.....	Boilers surveyed, with date, denoting that the Boilers were found, upon inspection at that time, to be in good condition.
C.....	Coppered, with date (Col. 2).
C.....	Compound Engines (Col. 7).
C.....	Placed before figures in Col. 10 indicates that the class of the Yacht was continued for the term of years stated, but that this term has expired.
Cat.....	Cat Rig.
CB.....	Copper or Yellow Metal bolted in accordance with paragraphs Nos. 12 and 13, section 23, of the Society's Rules (Col. 2).
Cb.....	Centerboard.
CellDB.....	Cellular Double Bottom.
Cem.....	Cemented.
cf.....	Corrugated furnaces (with number prefixed).
CH.....	Cabin House.
Cont.....	Continued, indicating that the Class of the Yacht has been continued in the Yacht Register for the number of years stated.
Cut.....	Cutter.
Ccl.....	Cycle of operation of Internal Combustion Engines.
Cyl.....	Cylinders (with number prefixed).
D.....	Diagonal Engines.
DB.....	Donkey Boiler, with steam pressure.
D.B.S.....	Donkey Boiler Surveyed (with date) denoting that the Donkey Boiler was found on inspection by the Society's Surveyors to be in good condition at that date.
DBa.....	Double Bottom aft.
DBf.....	Double Bottom forward.
DC.....	Deck Cabin.
DEnd.....	Double Ended Boilers, with number prefixed.
Dks.....	Decks, with number prefixed—U.Stl.W.S. (upper deck steel, wood sheathed).
DT.....	Deep Tank.
DS.....	Deck Sheathed.
Elec.....	Electric Motor.
F.....	Forecastle, with length affixed (Col. 2).
F.....	Fin-Keel (Col. 3).
Fcb.....	Fin Keel with centerboard.
FD.....	Flush Deck (Col. 3).
FD.....	Forced Draught (Col. 7).
FK.....	Flat-Keel.
FPT.....	Fore Peak Tank, with tons.
GS.....	Total Grate Surface of Boilers, with area in square feet.
Gas Eng.....	Gas or other Internal Combustion Engine.
HD.....	Half Decked.
Hor.....	Horizontal Engines.
HorOp.....	Horizontal Opposed Engines.
HS.....	Total Heating Surface of Boilers, in square feet.
HT.....	Half Time or Intermediate Survey held. (See Section 5 of the Rules for Wood Yachts.)
K.....	Keel
K-cb.....	Keel, with auxiliary centerboard.
Kch.....	Ketch.
LA&CP.....	Anchors and Chain Cables proved at a Machine under the superintendence of the Committee of LLOYD'S REGISTER. (See Tables 24 and 25 of the Rules.)
len.....	Yacht lengthened, with date.
LMC.....	Lloyd's Machinery Certificate, with date, denoting that the Machinery and Boilers are fitted in accordance with the Society's Rules, and were found at the date mentioned to be in good condition.

L.M.C. (M).	Lloyd's Machinery Certificate with date denoting that a modified survey of the machinery has been held and that at the date mentioned the machinery was found to be in good condition.
Mat.....	Materials, with number of years prefixed, indicating the different grades of Wood used in Yacht's construction.
MS.....	Machinery surveyed, with date, denoting that the Machinery was found, on inspection at that time, to be in good condition.
MT.....	Midship Deep Tank.
NB.....	New Boiler, with date when constructed.
ND.....	New Deck.
NDB.....	New Donkey Boiler, with date when constructed.
NE&B.....	New Engines and Boilers, with date of build.
NHP.....	Nominal Horse Power, by the Society's Rule.
O.....	Open Yacht.
OA.....	Over-All Length
P.....	Poop Deck (with length of same affixed).
Pad.....	Paddle.
pf.....	Plain furnaces (with number prefixed).
PO.....	Part Owner.
pt.....	Part.
Pwr.....	Power (in Col. 3) denotes a yacht propelled by other power than sail alone (Steam, or Internal Combustion Engine, or Electric Motor).
Q.....	Quadruple Expansion Engines (in Col. 7).
Q.....	Raised Quarter Deck (with length of same affixed).
RD.....	Raised Deck.
reb.....	Rebuilt
rf.....	Ribbed Furnaces (with number prefixed).
RFD.....	Raised Fore Deck.
Roof.....	Yacht built under a permanent and watertight roof, as per Sections 15 and 43 of the Rules.
SB.....	Single Ended Boilers (with number prefixed).
sc.....	Surface Condensing Engines.
Sch.....	Schooner.
Scw.....	Screw.
Slp.....	Sloop.
SS.....	Special Survey for Composite Yachts, with Port and date of Survey.
ss.....	Special Survey for Iron or Steel Yachts, with Port and date of Survey.
StnWhl.....	Stern Wheel.
Sub. Sig.....	Submarine Signal.
T.....	Triple Expansion Engines
TB.....	Turtleback.
TC.....	Trunk Cabin.
trB.....	Tiers of Beams, with number of same prefixed thus (2trB).
Tri.....	Triple Screws.
Tun.....	Screw in Tunnel.
Tur.....	Turbine Engine.
Twn.....	Twin Screws.
uE&B.....	Under Engines and Boilers
WB.....	Water Ballast.
WS.....	Wood Sheathed Decks.
WT.....	Water Tube Boilers.
WTel.....	Wireless Telegraph.
Ywl.....	Yawl.

ABBREVIATIONS FOR SURVEYING PORTS MENTIONED IN THE REGISTER

Bal.....	Baltimore, Md.
kn.....	Birkenhead, England
Bos.....	Boston, Mass.
Cws.....	Cowes, I. W., England
Gen.....	Genoa, Italy
Gls.....	Glasgow, Scotland
Gnk.....	Greenock, Scotland

The "Savarona" designed by Henry J. Gielow, Inc. Built by Pusey & Jones. 2—1500 H.P. Direct Reversible Bessemers. 2—Bessemer 110 K.W. Generating Sets and 1 Bessemer 40 K.W. Generating Set.

Nothing so clearly demonstrates the position of pre-eminence enjoyed by Bessemer Diesel Marine Engines as the number and caliber of the larger and finer yachts for which they are consistently being selected.

The "Savarona," "Hi-Esmaro," and "Vanda" —each 3,000 H.P.—are all Bessemer Diesel powered.

Seaworthy Linery

Mosse's linens are known to yachtsmen for their appropriateness and excellent wearing quality.

Mosse linens are thoroughly seaworthy and never fail to reflect the good taste of their owner. Owner's and club signals or the name of the boat are embroidered on these linens and a large variety of colors enables the owner to harmonize his linens with the interior of dining salon, cabins, and bathrooms.

Please refer to numbers when inquiring or ordering from illustrations on next page.

8 *Beautiful Models*

From which to choose your A.C.F.

BEAUTIFULLY designed and superb in craftsmanship, the A. C. F. fleet is also a standard for seaworthiness.

One marvels at the way berths, lavatories, galleys and ample decks are included in limited space without crowding.

Notable among the eight different models in which A. C. F. is built are the following:

CRUISER-RUNABOUT . . . 26′ 9″ overall; sleeps 4, seats 7. Galley, icebox, lavatory. Mahogany finish. Speed 20 m. p. h.

The THIRTY . . . a *double-cabin* cruiser at low price. Sleeps 6. Completely equipped. Galley and lavatory. Wide cruising range. Seaworthy.

The FORTY . . . raised and *enclosed* bridge-deck. Forward and after cabins. Cockpit and large deck. Sleeps 6. Two lavatories. Galley. Trim and staunch.

The FORTY-SEVEN . . . famous among yachtsmen. Rakish in design, seaworthy, beautiful. Large galley and deck. Very comfortable.

The FIFTY-FOUR and *SIXTY-EIGHT* . . . twin-screw ocean going yachts. Superb in every line and appointment. Swift and powerful.

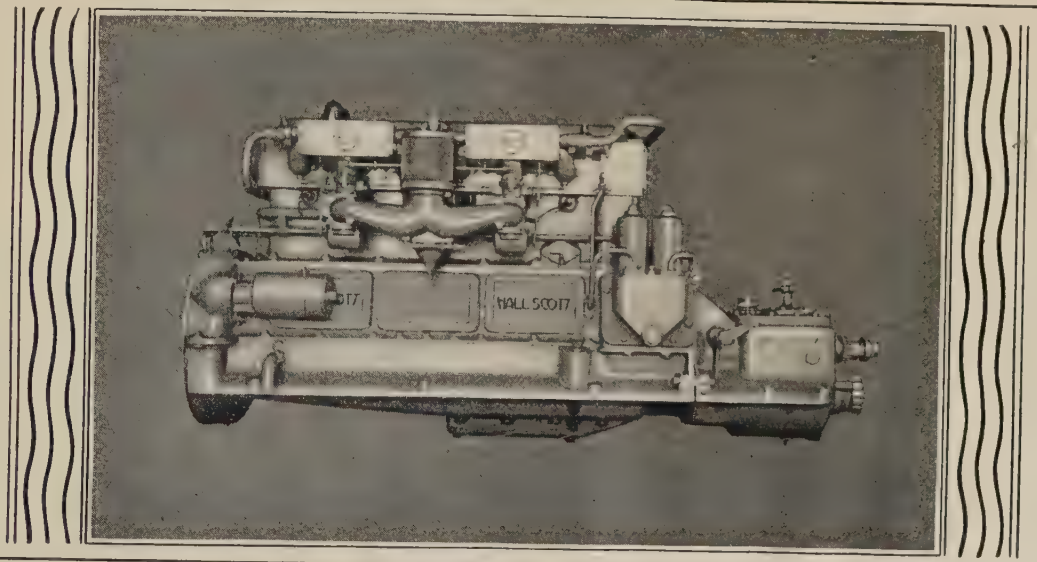

See all A. C. F. models at show rooms, or write for fully descriptive illustrated literature.

cruisers

AMERICAN CAR AND FOUNDRY COMPANY
NEW YORK SALON, 217 W. 57TH STREET

The lakes and sea-coasts of America are spangled with swift cruisers and stately yachts, powered by Hall-Scott engines. One has a feeling of utter dependability in their unfailing performance; a consciousness of their silent, redoubtable power. ¶ Designed by recognized masters and built with micrometric precision, Hall-Scott engines have that desired quality of getting you where you are going. A craft, powered by Hall-Scott, is one in which speed and smooth operation may be taken for granted.

Modern Yachts are SPERRY *Equipped*

The accurate and dependable Sperry Gyro-Compass is increasing the safety and pleasure of yachting. With its TRUE NORTH indications unaffected by magnetic disturbances, departures and arrivals are no longer delayed owing to the vagaries of an uncertain compass. Steering is also very greatly improved and the necessary number of men in the crew is decreased with the Sperry Gyro-Pilot at the wheel.

Yachting comfort and enjoyment have also been raised to a new high level by means of the Sperry Gyro-Stabilizer, with which yachts ranging in size from 75 feet and up are now equipped.

Other Sperry equipment especially suited to yachts includes the Triple Steerer, which gives "Manual," "Hand-power" or "Automatic" Steering all in one machine, the Engine Speed indicator for the wheelhouse, the Rudder Indicator, and Searchlights for every purpose.

We will gladly supply you or your architect with full information regarding any of this equipment.

*Intimate views of Sperry equipment on the new Yacht "*VAGABONDIA*"*

You Should Read Every Issue of

EIGHTH AVENUE AT 57TH STREET
NEW YORK

The Magazine for Yachtsmen
Edited by Commodore Charles F. Chapman

MoToR BoatinG is recognized throughout the boating world as the finest marine magazine published. It is the most expensively edited magazine in the field. No amount of money or effort is spared to give you the latest news and the best features that can be produced.

You will also find MoToR BoatinG is a rare combination of expert information, thrilling sea stories and feature articles that instruct while they entertain. No wonder MoToR BoatinG has far more regular readers than any other magazine for yachtsmen. It is indeed the national magazine of Motor Boating and the favorite of the majority.

Place a yearly subscription now, so you will never miss an issue. $3.00 by the year

YACHTS

BUILT, REPAIRED AND RECONDITIONED

United Dry Docks, Inc. makes a specialty of shipbuilding, dry docking, repairing, and reconditioning of yachts. It operates five yards in New York Harbor, formerly owned by

Theo. A. Crane's Sons Company
W. & A. Fletcher Company
Morse Dry Dock & Repair Company
New York Harbor Dry Dock Co., Inc.
James Shewan & Sons Company, Inc.
Staten Island Shipbuilding Company

Some of the yachts built by the Staten Island plant are:

The Steam Yachts "Noma" and "Rheclair"
The Sailing Yacht "Karina"
The Motor Yachts "Dixie IV" and "Ellen"

For the coming winter, part of the Shewan plant at the foot of 26th Street, Brooklyn, has been set aside and fitted out for the storage of yachts.

For efficient, prompt and economical service consult

WINTON ENGINES

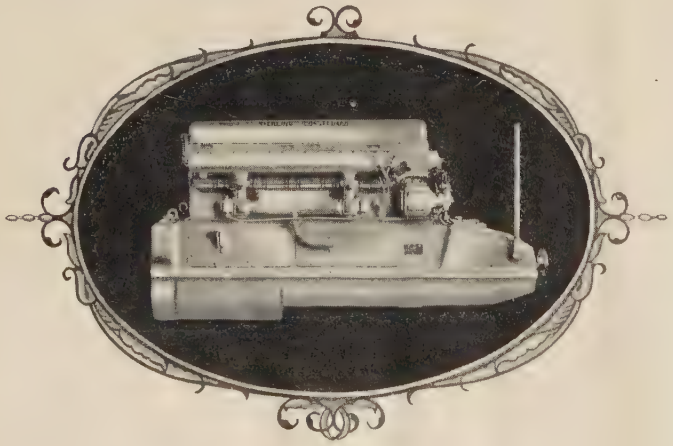

THE New-type, Light-weight, Winton-Diesel Marine Engine meets the growing demand for a high-class, light-weight, high-speed, Diesel Engine—suitable for yachts and houseboats. It is a highly developed, finished power plant, of the fully enclosed type. As simple in design and construction, and as clean, as a modern high-class gasoline engine. With its flashing start and instant maneuvering, this new Diesel provides a distinctly new and finer type of service. Built in a wide range of sizes.

Shipways to the Sea

Published May, 1929

No factor is more important to the economic fabric of the Nation than its waterways. "The sea is the economic solvent of our world."

Few subjects have more romantic and personal interest.

In Shipways to the Sea, *Ernest S. Clowes* has combined the human with the economic interest, and presents a concise story of our inland and coastal waterways—their history, the problems involved, the plans for development.

The Mississippi and Its Floods
The Great Lakes
The St. Lawrence Seaway
Barge Canals
Atlantic Coastal Waterways
Some Visionary Schemes
Why We Must Have the Waterways

Thoroughly illustrated with many half-tone plates. Two maps

Price $4.50

How the Weather is Made

The weather is not merely a matter of practical moment (sometimes of life and death) to the yachtsman——

He has an unparalleled opportunity for observation of the manufacture of it, in Nature's great laboratory.

Two entertaining books by a weather master, *W. J. Humphreys* of the U. S. Weather Bureau, add infinitely to one's understanding of weather phenomena and his appreciation of its beauties.

FOGS AND CLOUDS

The concise readable text discusses laws of evaporation and precipitation, why fogs and clouds are formed, how they give predictive signs of coming weather, the classification of cloud forms, a miscellany of interesting information about clouds and cloud splendors.

Then there are 93 cloud pictures—the finest collection ever assembled under one small cover.

The Nautical Gazette says: "This very remarkable book presents a complete cloud standard . . . . a great help in observing and solving weather problems . . . . valuable information for deck officers and all mariners."

Yachting says: "Remarkable compilation of information. The yachtsman with a hobby for prognostication could greatly increase his batting average by a study of it."

$4.00

RAIN MAKING And Other Weather Vagaries

Describes in a diverting vein the various attempts to control rain, magical, religious, and pseudo-scientific—and shows the reasons why "it can't be did."

A second portion discusses weather "mumpsimuses"—the fool ideas clung to despite manifest absurdity—influence of planets, control days, moon and weather, omens of flora and fauna, etc.

Alexander McAdie says, in Science, "No more helpful book is to be found . . . . stimulating and extremely convenient in meeting puzzling inquiries."

Seaman's Journal says: "When all the world has been stirred by repeated disasters to the Florida coast, the timely coming of this book has a particular significance."
